

## Silicone LED Neon Flex Diffuser Body for LED Strip 16 × 16mm

Flexible opal silicone cover for LED strip up to 10mm, supplied by the metre.

### SPECIFICATION

|                |                               |
|----------------|-------------------------------|
| Profile type   | Flexible silicone cover       |
| Section        | 16 × 16mm                     |
| Length         | 1–50 metres, per metre        |
| LED strip size | Up to 10mm                    |
| Material       | Silicone                      |
| Finish         | Opal                          |
| Diffuser       | Integral opal silicone        |
| IP rating      | IP65 — surface splash only    |
| Mounting       | Clips or aluminium profile    |
| Form           | Flexible, top / vertical bend |
| Weight         | See product page              |
| Guarantee      | 7 years                       |

### IN THE BOX

- 1 × silicone body
- Strip not included

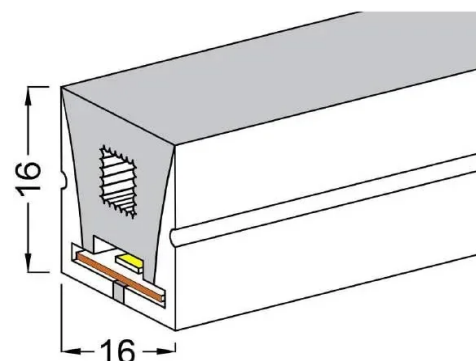

### DESCRIPTION

This 16 × 16mm flexible silicone body turns a bare LED strip into a neon-style line of light. Feed strip up to 10mm wide into the channel along the base; the opal silicone above it softens the individual LEDs into a diffused, even glow.

Order the length you need from 1 to 50 metres. Fix it with clips, or sit it inside an aluminium profile for a straight recessed run. It bends top to bottom (a vertical bend), so it follows curves, lettering and stair outlines on site. No strip is included — this is the silicone housing only.

IP65 keeps splashes off the strip, but that is surface-splash protection only — keep it out of standing water and wet zones.

### DIMENSIONS

Cross-section — all dimensions in millimetres
